(57) Abstract :

The present discloses a casing 100 for fastening devices 110. The proposed casing 100 can include channels 102 that can be to hold the fastening devices 110. The casing 100 can also include a supporting belt 108 that can clasp the fastening devices 110. The casing 100 can further include cavities 104 and 106 that can be adapted to fix at least one arm of at least one of the fastening devices 110, thereby, facilitating application of maximum torque at said fastening device 110. The casing 100 can also have an engaging element 112 through which the casing 100 can be hanged at a wall.
