(57) Abstract :

The present disclosure pertains to an apparatus 100 that is adapted to accommodate and monitor presence of one or more objects. The apparatus 100 includes a casing that can include one or more sections to accommodate said objects. The apparatus 100 includes sensors 102, where the sensors 102 can be operatively coupled to the sections of the apparatus 100, and configured to sense presence and absence of said objects. The apparatus 100 includes a processing unit 104 that can be configured to alert a user if an object is found to be absent from the apparatus 100.
