(57) Abstract :

The present disclosure relates to an apparatus (100) for providing riveted concentration and focus to a user practicing meditation. The invention provides for a height adjustable stand (112) that can modify and regulate the height depending on the comfort of the user. A light illumination assembly (110) along with concentration enhancing images (114) are provided in the apparatus (100) that can enable the user to practice meditation for a long duration.
