(57) Abstract :
 The present disclosure provides a device (100) for massaging head, oiling the head, and massaging ears of a wearer to provide relief from pain and stress. The device includes a body like a cap to be worn or fixed over the head of the wearer. The device includes vibration units (104) to provide massage to the head, a scalp massager (106) to massage and oil the scalp, and a pair of ear shields (116) to provided massage on the ears. Moreover, the device (100) is actuated by an interface provided to the body or from a mobile computing device to reduce human efforts. The device (100) is designed like a cap that enables the user to wear the device on the head easily. Also, the device allows the wearer to activate the vibration units (104) based on head pain and enables the wearer to control the vibration speeds of the vibration unit during the use of the device from the mobile computing device.
